FREE WORKSHEET

Personal AI Clone Worksheet

A printable companion for defining your first use case, setting boundaries, and building a clone that helps without taking over.

Use plain language. Keep it simple. Start with one low-risk job.

How to Use This Worksheet

This worksheet is designed to help you build one practical AI assistant for everyday admin. Short answers are enough.

Best first use cases	daily planning, routine email drafts, lists, weekly review
What to avoid at first	medical, legal, financial, or highly sensitive decisions
Success test	Does this save time and make life feel lighter within one week?

Part 1: Why Build This?

Clarify what you want help with and what would make this worth using.

1. What do you want help with most?

- ☐ planning my day
- ☐ drafting emails
- ☐ errands and shopping lists
- ☐ organizing tasks
- ☐ weekly review
- ☐ other

2. What feels frustrating or time-consuming right now?

3. What would make this worth it?

Examples: save 20 minutes a day, fewer forgotten tasks, faster replies, less mental clutter.

Parts 2-4: Scope and Boundaries

Pick one starting use case, decide what the clone should do, and define what it should never do.

Part 2. My starting use case

Examples: turn messy notes into a clean to-do list, draft routine replies, create a realistic daily plan, prepare a weekly checklist.

Why I picked it

Part 3. What I want the clone to do

- [ ] prioritize tasks
- [ ] draft short email replies
- [ ] summarize notes
- [ ] suggest reminders
- [ ] sort into today / this week / later
- [ ] create shopping or errand lists
- [ ] identify missing information

Part 4. What it must never do

- [ ] send emails without review
- [ ] make promises to other people
- [ ] give legal advice
- [ ] handle sensitive personal matters
- [ ] reschedule appointments
- [ ] give medical advice
- [ ] make financial decisions
- [ ] store highly private information

Parts 5-7: Voice, Examples, and Rules

Capture how the assistant should sound and the rules it should follow.

Part 5. My preferred tone

Examples: short and friendly, warm but direct, calm and practical, clear and not too formal.

How long should outputs be?

Examples: very short, short unless I ask for detail, bullet points only, brief summary plus action list.

What should it prioritize?

Examples: urgent first, easiest wins first, appointments first, anything overdue first.

Part 6. What real examples can I give it?

Examples: 5 to 10 emails I already wrote, old to-do lists, planning notes, reminders I send myself, scheduling habits.

Part 7. Finish these sentences

Always	
Never	
Ask me before	

Parts 8-10: Prompt, Test, and Score

Turn your decisions into a first prompt, then evaluate how useful the results really are.

Part 8. Prompt template

You are my personal AI assistant. Help me with [main task].

My preferences:
- Tone: [tone]
- Length: [length]
- Priorities: [what matters first]

Your job:
- [job 1]
- [job 2]
- [job 3]

Rules:
- Always [rule]
- Always [rule]
- Never [rule]
- Never [rule]
- Ask me before [rule]

When I give you notes or tasks, return:
1. Top priorities
2. Quick wins
3. Drafts or lists
4. Questions for me

Part 9. Test on a real example

Use one real-life batch such as today's schedule, loose tasks, errands, and two emails needing replies.

Part 10. Score the output from 1 to 5

Question	Score	Notes
Was it useful?		
Was it accurate?		

Did it sound like me?		
Did it save time?		
Did it stay within limits?		

Parts 11-13: Troubleshooting and First Week Plan

Use this page to adjust the system and decide whether it deserves to become part of your routine.

Part 11. If the output is weak, check the likely issue

- [ ] too broad: narrow the use case
- [ ] too vague: add clearer rules
- [ ] wrong tone: add real examples
- [ ] too much guessing: tell it to ask for missing details
- [ ] too much work to review: reduce scope

What I should change next

_____

_____

_____

Part 12. Fit and risk check

- [ ] Are the tasks repetitive?
- [ ] Are they low risk?
- [ ] Can I review before using the output?
- [ ] Would saving a small amount of time consistently help me?
- [ ] Am I comfortable not sharing highly sensitive information?

Part 13. My first week plan

Day 1	I will test it on
Day 2	I will improve
Day 3	I will add

Day 4	I will review whether it helped with
Day 5	I will decide whether to keep using it for

Final reminder: This clone should help with friction, not replace judgment. If it does not make life simpler, it is not the right setup yet.
